The natural materials used in manufacturing contribute to the variations in shades characteristic in genuine clay pavers. The photography in this brochure is as closely representative of product colors as printing technology allows. Glen-Gery recommends, however, that final selection should always be based on an actual product sample.

Glen - Gery Paving Brick

Patterns of Distinction

Discover the elegance and charm of Glen-Gery paving brick. In patios, walkways, driveways, steps and pool decks they harmoniously connect indoor and outdoor living spaces, reflecting an oasis of natural beauty year round. As part of a landscape design, brick pavers add to a home's overall appearance and value. When used in commercial applications, the natural warmth of pavers create inviting public spaces, uniting architectural and environmental elements on a more human scale. Through the use of decorative bond patterns, the rich colors, pleasing textures and enduring beauty of genuine clay pavers know no limit to creative potential!

Genuine clay pavers are manufactured to accurate dimensions in several sizes and are inherently resistant to staining, abrasion and the effects of freeze-thaw conditions. Their permanent earth tone colors and characteristic strength hold up beautifully season after season, year after year. Several distinct styles are available. In addition to the soft silhouette of molded pavers with a look reminiscent of handmade brick, there is also the crisp, uniform outline of extruded pavers finished in square, bevel or repress chamfered edges.

Bigler Plant paving brick is available in both square and repress chamfered finished edges.
